

## **Graphic Guidelines for large format fabric dye-sublimation**

If you have any concerns with the art you are supplying call us: 1-480-222-5558 or by email [info@arizonadisplays.com](mailto:info@arizonadisplays.com)

**Upon completion of your successful upload of files – please, confirm along with your file names to us by email sent to: [info@arizonadisplays.com](mailto:info@arizonadisplays.com)**

**IMPORTANT: Files can have no spaces or special characters in it.**

**Files that are preferable are the following: TIFF, EPS, Ai, PSD or the simple PDF. If anybody work on In Design just one click will export to a PDF and it solves all problems.**

Data Storage Formats: DVD / CD ROM / DTS FTP site (see below for FTP usage)

### **General Layout Requirements**

#### **Layout Scale**

1:1 is Best / 1:4 is Good / 1:8 is poor quality

#### **Document Setup**

Color mode: CMYK

Figure page setup as final size

**Outline** fonts in illustrator **ALL TEXT NEEDS TO BE OUTLINED**

Provide **PMS** color information

Provide hard copy or .PDF with dimensions and color info

Provide native files with extensions

**Layout / Scanning Requirements: Photoshop CS 2**

#### **File Format**

TIF, .EPS or .PSD (**layered filename are best** for color correction flexibility)

#### **Special Note:**

Scanning specifications: final print size: **100 d.p.i.**

- Do not increase the dpi of a 5mb to a 20mb. This doesn't add quality.
- When saving an .EPS file do not use .jpeg encoding use binary encoding.
- When saving a .TIFF file format, LZW compression may be used.
- When saving a .PSD file format, raster fonts or provide fonts and save with layers intact.

**Layout Requirements: Illustrator CS 2 – do not use for gradient colors – gradient colors use only Photoshop w/ noise filter**

File Format

EPS or AI

#### **Special Note:**

Use Vector art whenever possible. **Outline fonts**

Provide all placed images. Do not just embed them -This limits color correction
